

PRESS RELEASE

***“medicine & health 2005” – is out now!
The brandnew Course Catalogue for physicians and
experts in the health care sector***

Vienna, October 2004: “medicine & health”, the reliable guide for training and further education in the health sector is now available in a new edition! This catalogue filters the best 2.500 courses from the unmanageable flood of existing courses and presents them in a methodical manner, according to the current requirements of medical and public health experts.

The Course Catalogue contains the most valuable opportunities of further education, from postgraduate training and Master's degree courses up to specialist conferences.

“medicine & health” features top-level international training and further education:

- 2500 course offers from
- 45 countries and
- 700 renowned universities and international organisations;
- 150 links to relevant websites, as well as descriptions of
- 50 international journals

“medicine & health” is a compass for physicians of all specialties in the course of their career planning, for decision-makers and leading managers in health care and politics, as well as for those working in the fields of social work and non-profit organisations, especially for experts in international development cooperation and humanitarian aid. Moreover, the book features interesting articles by well-known scientists, which rounds off the course catalogue with additional background information.

The Course Catalogue is subdivided in the following chapters:

- Management and quality assurance
- Medicine - interdisciplinary
- Medical specialties
- Public health, epidemiology, health promotion, hospital management, health economy
- Research and Evidence-Based Medicine
- Humanitarian assistance and complex emergencies > missions abroad
- Development cooperation > missions abroad

The courses are presented in a systematic pattern: contents, requirements regarding qualifications and registration as well as information on the organiser.
